

Dodd Group have worked in partnership with Solihull Community Housing (SCH) since 2016, with the contract totalling a value of £10 Million Per Annum.

We work with SCH to provide responsive repairs, maintenance, and installation services to 10,508 properties across Solihull. These include housing, high-rise blocks, bungalows, sheltered housing, supported living schemes, temporary accommodation and office locations.

Our dedicated Partnership Manager Paul Davies oversees the contract, managing a team of skilled operatives and liaising closely with our Head of Retrofit and Building Services Daniel Camp, to deploy teams delivering planned and capital improvement works.

We promote a partnership methodology with SCH including Co-location in their offices, integrating our IT systems, dual branded fleet, joint training and added value workshops. Our combined efforts with SCH have led to innovative solutions and long-term success, reflecting our commitment to a successful contract.

"Dodd Group strive to exceed our expectations on all aspects of works requested of them, they align their corporate goals with ours and have a genuine interest in seamless team integration and excellent customer service. I have nothing but praise for a company with a genuine family feel who understands the complexity of working within the Social Housing environment. Although a successful commercial company, Dodd Group have the empathy and understanding to serve our customers as if they were part of our internal direct labour organisation."

Head of Asset Management and Development at Solihull Community Housing
