

BRITOL AIRPORT MULTI STOREY CAR PARK & TRANSPORT HUB

PROJECT NAME:

Britol Airport Multi Storey Car Park & Transport Hub

CLIENT:

Bristol Airport

M&E ORDER VALUE:

£3.2 million

CONTRACTOR:

Farrans Construction

CONSULTANT:

OCSC

The multi-storey car park provides over 2000 additional spaces; state of the art technology; blue badge parking; and will adjoin the existing multi-storey car park. The terminal will be accessed via a glazed pedestrian bridge link on the same level.

The top level of the car park provide's a dedicated Drop Off and Pick-up location for family, friends or taxis and a new gateway for all customers, with ease of access to the terminal

The public transport interchange hub provides access for coaches, buses and other forms of public transport on the top level of the multi-storey car park. The public transport interchange hub will more than double the number of bus/coach bays to 16 bays, enabling the Airport to be one of the region's largest bus/coach interchanges.

The M&E installation comprised of Cross site services, LV distribution, Lighting and Control systems, Fire and security, BMS, Dry risers, PA system, IT infrastructure, BCW, Rainwater, ventilation and sanitaryware.

Working in a live ever changing environment, flexibility and cooperation with the Client team to incorporate large number of changes in line with the development of their expanding operations.
