
PROJECT NAME:

Squadron Operations - Strike Eagle

CLIENT:

DIO / USAF

LOCATION:

RAF Lakenheath

M&E ORDER VALUE:

£7.6m

CONTRACTOR:

Kier

Dodd Group carried out the design, installation and commissioning of Electrical and Mechanical Services to two operations facility for 2 squadrons at RAF Lakenheath including standby generator, UPS and Air Conditioning Systems to full briefing facilities.

A challenging aspect was the SKIF area. The SKIF was a high security area within the building that required any conversation inside being prevented from reaching beyond the SKIF walls. This included introducing breaks in metal services through penetrations (i.e. adapting to plastic), transition to fibre optics, extreme acoustic measures, white noise speakers and more. The facilities include offices, receptions, briefing rooms, lecture theatre, gymnasium, feeder and recreational facilities and workshops.
