
PROJECT NAME:

Middleton Primary School

LOCATION:

Milton Keynes

M&E ORDER VALUE:

£600k

CONTRACTOR:

Wates Construction

Middleton School is an existing Primary School in Milton Keynes. The project consists of a new build extension which provides the school with additional teaching facilities, food tech areas, a fully working commercial kitchen and a large assembly hall which will also be used for out of hours sports activities.

As part of the project additional parking spaces and a new outdoor play area were created. Links to the existing school services without causing any disruptions to the teaching staff and pupils. This included upgrading the mains electricity supply to the existing school to give us enough capacity to feed the extension.

Interesting fact: The school protect a colony of great-crested newts: additional care had to be taken to protect the newts and to leave their colony un-disturbed.
