

Dodd Group has been appointed by Midas as the design and build contractor to deliver the MEP services associated with the new Ottery Building project for Truro & Penwith College at Bodmin.

Dodd Group will be working in collaboration with their appointed design partner Hydrock who have been involved in the successful delivery of many projects for Truro & Penwith College.

The Ottery building will offer engineering, manufacturing and digital skills for the aerospace, creative, energy and mining sectors. It will also provide a range of locally delivered nursing and care apprentices, which extends the current work being delivered with the Royal Cornwall Hospital trust.
